IMEA TRANSFORMER THEORY & CONNECTIONS WORKSHOP

How does electricity get generated in massive amounts from huge power plants (or wind generator farms, solar fields, etc.) and then travel into your living room outlet at the correct voltage to power your TV so you can catch your favorite episodes?

IMEA Executive Director, Duane Richardson conducted a two day transformer and theory connections workshop, offering detailed instruction on worksite safety, OH and UG transformer construction and theory of operations, electrical connections, vector diagrams, and transformer banking, troubleshooting and testing.

Auburn Electric Department hosted the two day training program along with participations from: Garrett Municipal Electric, and Columbia City Municipal Utility. All that participated received certification of attendance.

IMEA Spring Conference

May 15 - 17, 2019

EMBASSY
SUITES
