

Safety Message of the Day for IMEA Members

Distracted Driving (Cellphone Use) Safety Message

Using cellphones or other devices while driving has proven to be deadly. Cellphone use during driving is very prevalent on our roads today. In fact, at any given time throughout the day, approximately 660,000 drivers are attempting to use their phones while behind the wheel of an automobile.

Smartphones have made it easy for us to stay connected at all times. But that can pose serious safety risks if someone decides to check his or her text messages, emails, phone calls, or any other mobile applications while driving.

Discussion points:

1. Has distracted driving impacted anyone you know?
2. Discuss your company's cell phone/electronics use policy on the job.
