

## Safety Message of the Day for IMEA Members

### Involve the Right Person Safety Message

There are times when you will not have what you need to complete a task safely and correctly. Whether it is the proper training, tools, knowledge, time, materials, support, equipment, etc. there is a lot you need in place to do any one work task correctly. It is important to take the time to get the right people involved depending on what you need to get your work done.

No one has all the answers. If you do, you are **underpaid** and **underutilized**. The bottom line is we all need help from time to time. Take the time to do your work efficiently and safely. If that means stopping to involve the right person then do so.

### Discussion point:

Provide some examples when you had to stop work to involve another person to get a job done.
