

Safety Message of the Day for IMEA Members

Organization of Work Areas Safety Message

The way we set up our work areas makes a huge impact on our ability to work safely as well as efficiently. All too often, our work areas are set up and not changed for long periods of time, even when a rearrangement would be a great improvement. Complacency often plays a factor in why our work areas have not changed for the better. Taking the time to evaluate your work areas as well as taking action to eliminate hazards can prevent an injury from occurring.

Not only is productivity greatly affected when there is poor organization of a work area, there can also be great safety risks.

Take time to evaluate your work areas today. How long have they been organized in their current state? Is there a better way to set up a certain area? Were they better organized at one time and now they are not up to par? Think about how rearranging certain things can lead to fewer hazards as well as create a more pleasant place to work in general.
