

## Safety Message of the Day for IMEA Members

### Why We All Should Care Safety Message

Achieving a safe workplace takes effort from every single person who is employed there. Safety cannot be achieved through the effort of one or two people, even if it is the CEO who is putting forth the most effort in working towards having safe workplaces. Because of this fact, we all should care about the health and safety of everyone at work.

### Three Reasons Why We All Should Care About Safety

1. Health
2. Livelihoods
3. Business Continuity

### Summary

There are many other reasons not mentioned why we all should care about safety at work. We all have personal reasons for why we should want to work safely, but there should also be a focus on the reasons outside of only what will affect ourselves. We depend on each other not only to remain healthy while at work but also to help the company we work for continue to stay in business and provide the jobs that allow us to have an income.
