

Safety Message of the Day for IMEA Members

**YOU'RE EITHER PART
OF THE SOLUTION
OR YOU'RE PART OF
THE PROBLEM.**

Be a Part of the Solution Safety Message

Safety often boils down to problems and solutions. Problems creates hazards whereas solutions mitigate or eliminate the hazards. The level of safety in a workplace depends largely on the actions and decisions of the people working there. Due to safety depending so much on the actions and decisions of individuals, it can be said that each employee is either a part of the problem or a part of the solution.

When it comes to being part of the problem the list can be endless. The bottom line is negative actions and decisions can go a long way in the workplace. Even if the choices you make do not directly lead to you being injured, they can influence others to make poor choices that eventually lead to an injury.

You are either a part of the solution or a part of the problem when it comes to workplace safety. It takes effort from every single person every day for each worker to go home to the families in the same health or better than they arrived in.

Discussion points:

1. What are some actions that negatively affect safety here?
2. How can we be part of the solution in the efforts of creating a safer workplace?
