

## Safety Message of the Day for IMEA Members

### Give Yourself A Hand Safety Message

Two of the intricately designed instruments that we work with each day are our hands. We probably couldn't use any other devices that can take the beatings our hands take and still turn our precision maneuvers.

Like most things of marvel, we have come to take our hands for granted, except when we get our finger pinched in a door or touch something very hot, or perhaps receive a minor cut or scrape. Then we remember that our hands are present and that they're sensitive, too. Unfortunately, we forget this experience and start taking them for granted again.

A good thing to always keep in mind is that your hands are fearless. They'll go anyplace they're sent, and they'll act only as wisely as the person they belong to.
