

## IMEA Safety and Training Program Training Needs Survey

Dear IMEA Member,

The IMEA is committed to providing safety and/or technical training as needed by IMEA members. Recently, the IMEA Safety and Training Committee discussed the possibility of providing communication tower climbing and rescue training to IMEA members who have communications equipment.

In order to assess the need for such training I am asking that you to complete the following survey. Based on the information collected from this survey, the IMEA Safety and Training Committee will decide whether to move forward with creating a communication tower climbing and rescue training program. If the decision is made to provide this training program, the IMEA will offer this training to both IMEA and non-IMEA members.

Sincerely,  
IMEA Safety & Training Team
