

Safety Message of the Day for IMEA Members

Mobile Equipment Safety Message

Whenever mobile equipment is on your work site, you **MUST** watch your back. One small mistake, or one momentary distraction, can get you killed in an instant. If the equipment operators and workers are both watching out for each other, nobody will get hurt.

Heavy equipment is the most dangerous thing on your jobsite. All workers must have respect for the equipment.

You must display situational awareness, avoid distractions, and plan the work so that you can go home to your family.
