

Safety Message of the Day for IMEA Members

Backfeed Awareness Safety Message

Backfeed is a condition when voltage is present on a conductor or equipment after it has been disconnected from its normal source of feed.

Precautions

- * Treat all conductors and equipment as energized.
- * Wear Rubber Gloves until conductors are “cut in the clear”
- * Test for voltage
- * Where possible, eliminate the source.
- * Disconnect secondary taps
- * Remove primary taps
- * Test for voltage
- * LOTO as needed
- * Ground
