

## Safety Message of the Day for IMEA Members

### **Eye Protection - Seeing is Believing**

In just the blink of an eye, an incident can injure or even blind a worker who is not wearing proper protective eyewear. The type of eye protection-safety glasses, goggles, face shields, or helmets must meet the requirements of the Occupational Safety and Health Administration (OSHA) and the American National Standards Institute (ANSI). In hazardous workplaces, street wear eyeglasses should only be worn in conjunction with ANSI-approved additional cover protection.

NOTE: Since Jan 6, 2025 we've had 3 near misses relating to setting and pulling meters.
