

## Safety Message of the Day for IMEA Members

### Communication Is a Safety Tool

Miscommunication causes serious incidents.

Most close calls involve someone thinking someone else knew. Assumptions are dangerous. Clear, direct communication - especially during switching, rigging, and lifting - is critical.

Discussion Points:

- Are we using clear commands and repeat-backs?
- Who is in charge of the move right now?

***If you didn't hear it clearly, stop the job and ask. Silence is not confirmation***
