

Safety Message of the Day for IMEA Members

Gloves & Sleeves, - No Shortcuts

PPE only works when it's worn correctly and consistently. Rubber gloves and sleeves go on before exposure and stay on until clear. Face protection matters because arc and flash hazards don't give warnings. If PPE is damaged, contaminated, or uncomfortable, stop and fix it—don't work through it.

Crew check: Everyone good on glove class, test date, and condition?

***Our goal is simple - no surprises, no shortcuts, and everyone goes home
If conditions change, we stop and reset the plan***
