

Safety Message of the Day for IMEA Members

INSULATED PERSONAL PROTECTIVE EQUIPMENT (IPPE)

Air-Test Rubber Gloves

- Conduct a manual air test before every use by trapping air inside the glove and rolling the cuff toward the fingers.
- Listen and feel for leaks; inspect for bulges or weak spots.
- An air test helps identify pinholes not visible during visual inspection.

OSHA Reference: 29 CFR 1910.137(b)(2)(ii)
