

## Rigging & Hoisting Safety

### Wednesday: Suspended Load Hazards

#### Stay Clear of Suspended Loads

##### Points

- Never stand under a suspended load.
- Keep hands and feet away from pinch points.
- Use tag lines to control load movement.
- Establish and maintain a barricaded work zone.
- Be aware of load swing caused by wind or sudden movements.
- Communicate continuously with the equipment operator.

##### Reminders

- Loads can shift unexpectedly.
- One moment of inattention can result in serious injury or death.
- Stay outside the fall zone.

##### Question

Why should tag lines be used during lifting operations?
