

## 4th of July Safety Message

As we celebrate Independence Day, remember that holidays often bring increased hazards from storms, fireworks, and distracted drivers. If you're responding to outages, take the time to perform a thorough job briefing, wear the appropriate PPE, verify de-energization whenever possible.

***Never let urgency override safe work practices!***

Stay alert for impaired motorists when working roadside and maintain proper traffic control at all times. Most importantly, make every decision with one goal in mind - returning home safely to your family after every shift.

***Have a safe and enjoyable Fourth of July!***
