

Safety Message of the Day for IMEA Members

Your Attitude Is Part of Your PPE

A bad attitude can be just as dangerous as forgetting a piece of PPE. When we're irritated, distracted, or focused on what's wrong, we stop paying attention to what's in front of us. Linework doesn't care if you're having a bad morning. The voltage is still there, traffic is still moving, and gravity still works.

This week, check your attitude before you start the job. If something is bothering you, handle it, communicate it, and then get your head back in the work.

Takeaway: Protect your head with a hard hat—and protect the crew with the right mindset.
