

Safety Message of the Day for IMEA Members

See It, Say It, Stop It

Hazards don't become less dangerous because we wait to address them. When you see an unsafe condition, unsafe behavior, or unexpected change in the work area, take action immediately. Stop the task when necessary, communicate the concern to your crew, and make sure the hazard is controlled before work continues.

Key message: Don't assume someone else will take care of it. Recognize it, communicate it, and correct it.
