

Safety Message of the Day for IMEA Members

Don't Walk Past the Hazard

Walking past a hazard without addressing it creates a delay between hazard recognition and hazard control. That delay can be enough time for someone to get hurt. Whether it's poor housekeeping, an unprotected opening, damaged equipment, an overhead hazard, or an unsafe work practice, take ownership when you see it.

Key message: If you see a hazard and have the ability to prevent exposure, act before someone gets hurt.
