

Safety Message of the Day for IMEA Members

Conditions Change - Stay Alert

Hazard awareness isn't something we do only at the beginning of the shift. Equipment moves, weather changes, materials arrive, other trades enter the area, and the scope of work can change. A safe work area at 7:00 a.m. may have completely different hazards by noon. Stay engaged and continuously reassess your surroundings.

Key message: When conditions change, stop, reassess the hazards, communicate with the crew, and adjust the plan before continuing.
