

Safety Message of the Day for IMEA Members

Act Before an Incident Happens

Recognizing a hazard is only the first step. The goal is to eliminate the delay between seeing the problem and taking action. If something doesn't look right, don't wait until the next meeting, break, or shift change. Stop the exposure, notify the appropriate people, and establish the proper controls.

Key message: The best time to correct a hazard is before anyone is exposed to it. See it early. Speak up immediately. Take action.
